DETAILED ACTION

Allowable Subject Matter

1. Claims 104, 106-111, 113, 115-118, 133-136, and 138-142 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to Independent Claims 138 and 139, the Applicant has sufficiently amended and narrowly defined an optical assembly including a light emitting panel having individual optical deformities to provide a generally uniform field of illumination for a liquid crystal display overlying a light emitting surface area of said panel except in a localized region within the uniform field of illumination where the individual optical deformities are varied to create a watermark, security marking, label or other effect within the uniform field of illumination having a form or shape of at least one of text, graphics, logo or image that is viewable through the display. The prior art of record fails to teach or suggest the combination of structural elements, specifically the light emitting panel overlaid with the LCD such that individual optical deformities on said light emitting panel are varied to create an image viewable through the LCD display while at the same time providing a uniform field of illumination having a form or shape of at least one of text, graphics, logo or image, claimed therein, and all subsequent dependent claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
